EVALUATION SUMMARY

Analysis of Prior Sale or Transfer History of the Subject Property or Comparable Sales: The subject sold 9/2/2020 for $315,000, which appears to be a standard transaction. Despite currently stable market conditions, an increase is observed from 1 year prior as well as from the subject's prior purchase date. The appreciation in value when compared to the 9/2020 purchase price is attributed to market trends as supported by current sales data. There have been no sales of the sale in the past 12 months. Note: The current HOA Fees could not be confirmed, the amount presented in the Client and property Information above represents the fees at the time of the 2020 sale.

General Comments: See Attached Addendum

The Appraiser has researched the transfer and listing history of the subject property for the past 3 years and the comparable sales for the past 12 months.

Condition Ratings and Definitions

C1 The improvements have been very recently constructed and have not previously been occupied. The entire structure and all components are new and the dwelling features no physical depreciation.*

*Note: Newly constructed improvements that feature recycled materials and/or components can be considered new dwellings provided that the dwelling is placed on a 100% new foundation and the recycled materials and the recycled components have been rehabilitated/re-manufactured into like-new condition. Recently constructed improvements that have not been previously occupied are not considered "new" if they have any significant physical depreciation (i.e., newly constructed dwellings that have been vacant for an extended period of time without adequate maintenance or upkeep).

C2 The improvements feature no deferred maintenance, little or no physical depreciation, and require no repairs. Virtually all building components are new or have been recently repaired, refinished, or rehabilitated. All outdated components and finishes have been updated and/or replaced with components that meet current standards. Dwellings in this category either are almost new or have been recently completely renovated and are similar in condition to new construction.

*Note: The improvements represent a relatively new property that is well maintained with no deferred maintenance and little or no physical depreciation, or an older property that has been recently completely renovated.

C3 The improvements are well maintained and feature limited physical depreciation due to normal wear and tear. Some components, but not every major building component, may be updated or recently rehabilitated. The structure has been well maintained.

*Note: The improvement is in its first-cycle of replacing short-lived building components (appliances, floor coverings, HVAC, etc.) and is being well maintained. Its estimated effective age is less than its actual age. It also may reflect a property in which the majority of short-lived building components have been replaced but not to the level of a complete renovation.

C4 The improvements feature some minor deferred maintenance and physical deterioration due to normal wear and tear. The dwelling has been adequately maintained and requires only minimal repairs to building components/mechanical systems and cosmetic repairs. All major building components have been adequately maintained and are functionally adequate.

*Note: The estimated effective age may be close to or equal to its actual age. It reflects a property in which some of the short-lived building components have been replaced, and some short-lived building components are at or near the end of their physical life expectancy; however, they still function adequately. Most minor repairs have been addressed on an ongoing basis resulting in an adequately maintained property.

C5 The improvements feature obvious deferred maintenance and are in need of some significant repairs. Some building components need repairs, rehabilitation, or updating. The functional utility and overall livability is somewhat diminished due to condition, but the dwelling remains useable and functional as a residence.

*Note: Some significant repairs are needed to the improvements due to the lack of adequate maintenance. It reflects a property in which many of its short-lived building components are at the end of or have exceeded their physical life expectancy but remain functional.

C6 The improvements have substantial damage or deferred maintenance with deficiencies or defects that are severe enough to affect the safety, soundness, or structural integrity of the improvements. The improvements are in need of substantial repairs and rehabilitation, including many or most major components.

*Note: Substantial repairs are needed to the improvements due to the lack of adequate maintenance or property damage. It reflects a property with conditions severe enough to affect the safety, soundness, or structural integrity of the improvements.

Quality Ratings and Definitions

Q1 Dwellings with this quality rating are usually unique structures that are individually designed by an architect for a specified user. Such residences typically are constructed from detailed architectural plans and specifications and feature an exceptionally high level of workmanship and exceptionally high-grade materials throughout the interior and exterior of the structure. The design features exceptionally high-quality exterior refinements and ornamentation, and exceptionally high-quality interior refinements. The workmanship, materials, and finishes throughout the dwelling are of exceptionally high quality.

Q2 Dwellings with this quality rating are often custom designed for construction on an individual property owner's site. However, dwellings in this quality grade are also found in high-quality tract developments featuring residences constructed from individual plans or from highly modified or upgraded plans. The design features detailed, high-quality exterior ornamentation, high-quality interior refinements, and detail. The workmanship, materials, and finishes throughout the dwelling are generally of high or very high quality.

Q3 Dwellings with this quality rating are residences of higher quality built from individual or readily available designer plans in above-standard residential tract developments or on an individual property owner's site. The design includes significant exterior ornamentation and interiors that are well finished. The workmanship exceeds acceptable standards and many materials and finishes throughout the dwelling have been upgraded from "stock" standards.

Q4 Dwellings with this quality rating meet or exceed the requirements of applicable building codes. Standard or modified standard building plans are utilized and the design includes adequate fenestration and some exterior ornamentation and interior refinements. Materials, workmanship, finish, and equipment are of stock or builder grade and may feature some upgrades.

Q5 Dwellings with this quality rating feature economy of construction and basic functionality as main considerations. Such dwellings feature a plain design using readily available or basic floor plans featuring minimal fenestration and basic finishes with minimal exterior ornamentation and limited interior detail. These dwellings meet minimum building codes and are constructed with inexpensive, stock materials with limited refinements and upgrades.

Q6 Dwellings with this quality rating are of basic quality and lower cost; some may not be suitable for year-round occupancy. Such dwellings are often built with simple plans or without plans, often utilizing the lowest quality building materials. Such dwellings are often built or expanded by persons who are professionally unskilled or possess only minimal construction skills. Electrical, plumbing, and other mechanical systems and equipment may be minimal or non-existent. Older dwellings may feature one or more substandard or non-conforming additions to the original structure.

Definitions of Not Updated, Updated, and Remodeled

Not Updated
Little or no updating or modernization. This description includes, but is not limited to, new homes.
Residential properties of fifteen years of age or less often reflect an original condition with no updating, if no major components have been replaced or updated. Those over fifteen years of age are also considered not updated if the appliances, fixtures, and finishes are predominantly dated. An area that is 'Not Updated' may still be well maintained and fully functional, and this rating does not necessarily imply deferred maintenance or physical /functional deterioration.

Updated
The area of the home has been modified to meet current market expectations. These modifications are limited in terms of both scope and cost.
An updated area of the home should have an improved look and feel, or functional utility. Changes that constitute updates include refurbishment and/or replacing components to meet existing market expectations. Updates do not include significant alterations to the existing structure.

Remodeled
Significant finish and/or structural changes have been made that increase utility and appeal through complete replacement and/ or expansion.
A remodeled area reflects fundamental changes that include multiple alterations. These alterations may include some or all of the following: replacement of a major component (cabinet(s), bathtub, or bathroom tile), relocation of plumbing/gas fixtures/appliances, significant structural alterations (relocating walls, and/or the addition of square footage). This would include a complete gutting and rebuild.

FLEX APPRAISAL REPORT

File No.: 14648313
Loan No.:

PURPOSE OF APPRAISAL: The purpose of this appraisal is to form an "as is" opinion of the market value of the real property that is the subject of this report based upon a quantitative sales comparison analysis for use in the mortgage finance transaction.

DEFINITION OF MARKET VALUE: The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and acting in what they consider their own best interests; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in United States dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.

INTENDED USE: This appraisal report is intended for use only by the client. The function of this appraisal is to help the client analyze the risk associated with making a loan on the subject property.

INTENDED USER: The intended user of this appraisal report is the lender/client identified.

SCOPE OF THE APPRAISAL: The scope of this appraisal consists of identifying the characteristics of the subject property that are relevant to the purpose and intended use of the appraisal, as previously addressed. For the subject, this is accomplished by reviewing public record data, prior appraisal files and/or other documentation from a disinterested source and which is considered reliable from the appraiser's perspective. The data sources for the comparable sales may include public record data services, multiple listing services, automated valuation models and/or other data sources that become available and are deemed to be reliable by the appraiser. The confirmation of comparable sale data (i.e., closed sale documentation and property characteristics) is via public data sources and multiple listing services, as appropriate. The appraiser has not viewed the sales in the field. The data is collected, verified and analyzed in accordance with set parameters as defined within this Scope and the Intended Use of the appraisal. Atypical variances of comparable sales in relation to the subject will be accounted for and detailed in this report.

In developing this appraisal report, the appraiser has incorporated only the Sales Comparison Approach unless otherwise noted in the addenda attached hereto. The appraiser has determined that the scope of this assignment does produce credible assignment results. The client agrees that the limited scope and presentation of the analysis is appropriate given the intended use.

If no inspection of the property is completed, the appraiser has made some basic assumptions, including the following:

- The subject property is assumed to be in average overall condition and generally conforms to the neighborhood in terms of style, condition, construction materials and in external and economic factors.
- There are no adverse environmental conditions (hazardous wastes, toxic substances, etc.) present in the improvements, on the site, or in the immediate vicinity of the subject property.
- There are no significant discrepancies between the public record information or other data source and the existing site or improvements.

ANALYSIS OF ANY CURRENT AGREEMENT OF SALE, PRIOR SALE WITHIN THREE YEARS AND RECONCILIATION: Unless otherwise noted, the appraiser has no knowledge of any current agreement of sale or any current or past listing agreement. Prior sales of the subject property within three years of the effective date of this appraisal have been researched and reported on the appraisal report (in the Transfer History section) if available from MLS or public record sources. The appraiser has reconciled the quality and quantity of data available into an indication of Market Value, in accordance with the Intended Use and Scope of the Appraisal.

STATEMENT OF CONTINGENT AND LIMITING CONDITIONS: The Appraiser's Certification that appears in this report is subject to the following conditions:

1. The appraiser will not be responsible for matters of a legal nature that affect the subject property.
2. The appraiser assumes the title is good and marketable and, therefore, will not render any opinions about the title. The property is appraised on the basis of it being under responsible ownership.
3. The appraiser will not give testimony or appear in court because he or she performed this appraisal unless specific arrangements to do so have been made beforehand.
4. The appraiser assumes that there are no adverse conditions associated with the improvements or the subject site. Unless otherwise stated in this report, the appraiser has no knowledge of any hidden or apparent conditions of the property or adverse environmental conditions (including the presence of hazardous wastes, toxic substances, etc.) present in the improvements, on the site or in the immediate vicinity that would make the property more or less valuable, and has assumed that there are no such conditions. The appraiser makes no guarantees or warranties, express or implied, regarding the condition of the property. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, the appraisal report may not be considered an environmental assessment of the property.
5. The appraiser obtained the information, estimates, and opinions that were expressed in the appraisal report from sources that he or she considers reliable and believes them to be true and correct. The appraiser does not assume responsibility for the accuracy of such items that were furnished by other parties.
6. The appraiser will not disclose the content of the appraisal report except as provided for in the Uniform Standards of Professional Appraisal Practice.
7. Unless otherwise noted in this report, the appraiser has assumed that the subject real estate's zoning classification complies with local zoning code.
8. Unless otherwise noted in this report, the appraiser's opinion of reasonable exposure time at the market value stated in this report is equal to the indicated marketing time noted on page 1 of this report.

APPRAISER'S CERTIFICATION: Unless otherwise noted in this report, the appraiser certifies, to the best of my knowledge and belief:

1. The statements of fact contained in this report are true and correct.
2. The reported analyses, opinions and conclusions are limited only by the reported assumptions and limiting conditions, and are my personal, impartial, and unbiased professional analyses, opinions, and conclusions.
3. I have no present or prospective interest in the property that is the subject of this report, and no personal interest with respect to the parties involved.
4. I have no bias with respect to the property that is the subject of this report or to the parties involved with this assignment.
5. My engagement in this assignment was not contingent upon developing or reporting predetermined results.
6. My compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this appraisal.
7. My analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the Uniform Standards of Professional Appraisal Practice.
8. I have not made a personal inspection of the comparable sales noted in this report.
9. I personally prepared all conclusions and opinions about the real estate that were set forth in this appraisal report. I have identified all relied upon sources to develop this appraisal report and appraisal assignment. I have identified any individuals who provided significant assistance in developing the opinion of value, or preparation of the appraisal report, and have disclosed any tasks provided by such individuals on page 2 Condition Inspection page or attached addenda.
10. Unless otherwise noted in this report, I have performed NO services, as an appraiser or in any other capacity, regarding the property that is the subject of this report within the three-year period immediately preceding acceptance of this assignment.

Hightest and Best Use Analysis
The subject is a legally permissible use based on its current zoning. Based on current market conditions, the existing structure as a single-family residence is its financially feasible and maximally productive use. The highest and best use, as if vacant, would be to construct a single-family residence.

Comparable Sales Comments
The sales are proximate to the subject and in the same development with sales one and two the most recent. Limited verifiable sales activity resulted in using one dated sale but it has closed in the past 12 months. The sales are in a development of attached and detached town homes. Sale one is the most similar in this respect and is weighted most heavily. Sale one is also the most recent sale. There appears to be no measurable difference with respect to sales price and DOM between attached and detached units in the subject development of Walker Station. The subject and all comparable used are sufficiently similar in effective age that differences in actual age receive little market recognition. Therefore, the appraiser has made no adjustments for actual age.
The comparable sales provided are located within the subject's competitive market area and would appeal to similar qualified buyers. The sales presented appear to be reasonable competitive alternatives to the subject. The subject, comparable sales and the market data within this report are supported by in house data, MLS, Realtor.com and/or SiteX data. Adjustments are within guidelines and are consistent with current market trends in the area. Adjustments are based on historical paired analysis, Appraiser's market knowledge and experience, peer appraisals and available market data.

Extra Comments
Appraiser Independence Comment: This Certifies that the above referenced appraisal report was completed in compliance with the Appraiser Independence Requirements (AIR) and the USPAP standards. The undersign appraiser(s) responsible for preparing the above referenced appraisal report hereby certify that the report was completed and the opinion of value developed in accordance with USPAP standards; and at no time did any employee, director, officer, or agent of the lender or any third party acting as joint venture partner, independent contractor, appraisal company appraisal management company or partnering on behalf of the lender, influence or attempt to influence the development, reporting, result or review of the report. The appraiser(s) further certify, I (we) are currently licensed and/or certified by the state in which the property to be appraised is located, and that there have been no sanctions against me (us) for any reason that would impair my ability to perform appraisals. The undersigned certifies the appraisal report is in compliance with the Appraisal Independence provisions.

I have not provided a prior services of the subject within the past three years.

A reasonable estimate of exposure time is 30-60 days.

Due to the Age of the Home, the Cost Approach is not considered a reliable indicator of value. Due to limited Single Family Rentals in the Subject's Market Area, the Income Approach To Value is not considered to be reliable and therefore the Sales Comparison approach is given greatest weight in the indication of market value.

Research conducted to support appropriate usage of assumptions stated in Scope of Appraisal and Statement of Contingent and Limiting Conditions
Satellite/aerial view mapping was used and viewed for the subject as an onsite inspection was not completed.

Subject's zoning classification has been verified and NOT assumed.

Summary of purchase contract analysis for purchase transaction assignments.
-This report is not for a purchase.

Adjustments were derived from market sensitivity based upon long term contributory value analysis of the North Carolina markets. e.g. previously analyzed pair sales. Adjustments made are deemed warranted and appropriate."

Please note the appraiser has relied either upon paired sales analysis, market extraction, local builders, realtors, building cost databases, appraiser contributory databases and local MLS to develop adjustments
