One-Unit Residential Appraisal Desk Review Report

15926209
File # R0051426

The purpose of this appraisal desk review report is to provide the lender/client with an opinion on the accuracy of the appraisal report under review.

Property Address 195 Canary Hill Rd City Kingston State NY Zip Code 12401
Borrower Charles Bogle Owner of Public Record Paul & Miryam Sinclair County Ulster
Legal Description Libre 6316 Page 1243; Section 55.1: Block 3: Lot 22.300
Assessor's Parcel # 55.1-3-22.300 Map Reference 28740 Census Tract 9529.01
Property Rights Appraised ☒ Fee Simple ☐ Leasehold ☐ Other (describe) Project Type ☐ Condo ☐ PUD ☐ Cooperative
Loan # Effective Date of Appraisal Under Review 03/26/2024 Manufactured Home ☐ Yes ☒ No
Lender/Client Wells Fargo Bank NA Address 2701 Wells Fargo Way, Minneapolis, MN 55467

SECTION I – COMPLETE FOR ALL ASSIGNMENTS

1. Is the information in the subject section complete and accurate? ☐ Yes ☒ No If Yes, provide a brief summary. If No, explain Based on report having a date of valuation of 3/2024 the tax year should be 2024. The correct tax amount for subject property is $17,200.50 as verified by tax bills.

2. Is the information in the contract section complete and accurate? ☒ Yes ☐ No ☐ Not Applicable If Yes, provide a brief summary. If No, explain
Contract was supplied for review and no errors reported.

3. Is the information in the neighborhood section complete and accurate? ☐ Yes ☒ No If Yes, provide a brief summary. If No, explain Information within the neighborhood section has inconsistent information. Appraiser addendum for market conditions contradicts p1 information that states in balance supply and demand. However, appraiser addendum shows 35 sales and 15 listings 7-12 months back. 4-6 months back 14 sales 16 listings. 3 months back there are 11 sales and 17 listings. It appears there is actual a decline in sales and a shortage. A review of HVCRMLS states for the past twelve months within the Marbletown area the median and average days on market is less than 90 days and not 3-6 months.

4. Is the information in the site section complete and accurate? ☐ Yes ☒ No If Yes, provide a brief summary. If No, explain See attached addenda.

5. Is the data in the improvements section complete and accurate? ☐ Yes ☒ No If Yes, provide a brief summary. If No, explain Subject property addendum states homes was measured to ANSI standards. However, ANSI requires measurements are taken to the nearest inch or tenth of a foot, and the final square footage is reported to the nearest whole square foot. However, sketch has all whole number measurements? Subject has a installed whole house generator that is affixed and wired into home. Unknown why appraiser did not include in the valuation as this has a positive effect on marketability.

6. Are the comparable sales selected locationally, physically, and functionally the most similar to the subject property? ☐ Yes ☒ No If Yes, provide a brief summary. If No, provide a detailed explanation as to why they are not the best comparable sales. Sale 2 is a modernist contemporary home and not of appeal to subject and construction is not similar to subject.

7. Are the data and analysis (including the individual adjustments) presented in the sales comparison approach complete and accurate?
☐ Yes ☒ No If Yes, provide a brief summary. If No, explain See attached addenda.

8. Are the data and analysis presented in the income and cost approaches complete and accurate? ☐ Yes ☐ No ☒ Not developed If No, explain
Subject is a single family home with ADU and the income approach is not typically prepared as there is a lack of rental data to develop this approach. Subject is only a 6 year old home with a 2 year effective age. The cost approach could be a meaningful approach if developed.

9. Is the sale or transfer history reported for the subject property and each of the comparable sales complete and accurate? ☒ Yes ☐ No If Yes, provide a brief summary. If No, analyze and report the correct sale or transfer history and the data source(s). Prior transfer history has been reported properly

10. Is the opinion of market value in the appraisal report under review accurate as of the effective date of the appraisal report?
☐ Yes ☒ No If No, complete Section II.

One-Unit Residential Appraisal Desk Review Report

File # 15926209 R0051426

SECTION II – COMPLETE ONLY IF REVIEW APPRAISER ANSWERS "NO" TO QUESTION 10 IN SECTION I.

1. Provide detailed reasoning for disagreement with the opinion of value in the appraisal report under review. Original appraisal contained adjustments not supported by paired analysis with adjustments less than market expectations. Sale 1 in OA did not contain correct acreage. Sale 2 was a modern design home that historically have higher market values and are of superior construction and higher market appeal. Subject is situated above a busier roadway, but not adjusted for.

2. State all extraordinary assumptions used (i.e. gross living area, room count, condition, etc.). Appraisal assumes all subject information is correct and was relied upon. If found to be different the assignment results could be affected.

3. Provide a new opinion of value as of the effective date of the appraisal report under review using the below sales comparison analysis grid.
(NOTE: This may or may not include the use of the same comparable sales in the appraisal report under review.)

One-Unit Residential Appraisal Desk Review Report

File # 15926209
R0051426

SCOPE OF WORK

The scope of work for this appraisal desk review is defined by the complexity of the appraisal report under review and the reporting requirements of this report form, including the following statement of assumptions and limiting conditions, and certifications. The review appraiser must, at a minimum: (1) read the entire appraisal report under review, (2) perform data research and analysis to determine the appropriateness and accuracy of the data in the appraisal report, (3) research, verify, and analyze data from reliable public and/or private sources, (4) determine the accuracy of the opinion of value, and (5) assume the property condition reported in the appraisal report is accurate unless there is evidence to the contrary.

If the review appraiser determines that the opinion of value in the report under review is not accurate, he or she is required to provide an opinion of market value. The review appraiser is not required to replicate the steps completed by the original appraiser that the review appraiser believes to be reliable and in compliance with the applicable real property appraisal development standards of the Uniform Standards of Professional Appraisal Practice. Those items in the appraisal report under review are extended to this report by the use of an extraordinary assumption, which is identified in Section II, Question 2. If the review appraiser determines that the opinion of value is not accurate, he or she must present additional data that has been researched, verified, and analyzed to produce an accurate opinion of value in accordance with the applicable sections of Standard 1 of the Uniform Standards of Professional Appraisal Practice. If the appraiser determines that credible results cannot be developed within the scope of work defined herein, the appraiser must determine and preform the scope of work necessary to produce credible results as required by the Scope of Work Rule.

INTENDED USE

The intended use of this appraisal desk review report is for the lender/client to evaluate the accuracy and adequacy of support of the appraisal report under review.

INTENDED USER

The intended user of this appraisal desk review report is the lender/client.

GUIDANCE FOR COMPLETING THE ONE-UNIT RESIDENTIAL APPRAISAL DESK REVIEW REPORT

The appraisal review function is important to maintaining the integrity of both the appraisal and loan underwriting processes. The following guidance is intended to aid the review appraiser with the development and reporting of an appraisal desk review:

1. The review appraiser must be the individual who personally read the entire appraisal report, performed the data research and analysis, and prepared and signed this report.
2. The review appraiser must focus his or her comments on the appraisal report under review and not include personal opinions about the appraiser(s) who prepared the appraisal.
3. The lender/client has withheld the identity of the appraiser(s) who prepared the appraisal report under review, unless otherwise indicated in this report.
4. The review appraiser must assume that the condition of the property reported in the appraisal report is accurate, unless there is evidence to the contrary.
5. This One-Unit Residential Appraisal Desk Review Report is divided into two sections. Section I must be completed for all assignments. Section II must be completed only if the answer to Question 10 in Section I is “No.”
6. The review appraiser must determine whether the opinion of market value is accurate and adequately supported by market evidence. When the review appraiser disagrees with the opinion of value, he or she must complete Section II. Because appraiser’s opinions can vary, the review appraiser must have conclusive evidence that the opinion of value is not accurate.
7. The review appraiser must explain why the comparable sales in the appraisal report under review should not have been used. Simply stating: “see grid” is unacceptable. The review appraiser must explain and support his or her conclusions.
8. The review appraiser must form an opinion about the overall accuracy and quality of the data in the appraisal report under review. The objective is to determine whether material errors exist and what effect they have on the opinions and conclusions in the appraisal report under review. When the review appraiser agrees that the data is essentially correct (although minor errors may exist), he or she must summarize the overall findings. When the review appraiser determines that material errors exist in the data, he or she must identify them, comment on their overall effect on the opinions and conclusions in the appraisal report under review, and include the correct information.
9. The Questions in Section I are intended to identify both the positive and negative elements of the appraisal under review and to report deficiencies. The review appraiser must make it clear to the reader what effect the deficiencies have on the opinions and conclusions in the appraisal report. Simple “Yes” and “No” answers are unacceptable.
10. The review appraiser must provide specific, supportable reasons for disagreeing with the opinion of value in the appraisal report under review in response to Question 1 in Section II.
11. The review appraiser must identify any extraordinary assumptions that were necessary in order to arrive at his or her opinion of market value. Extraordinary assumptions include the use of information from the appraisal report under review that the review appraiser concludes is reliable (such as an assumption that the reported condition of the subject property is accurate).
12. The review appraiser must include the rationale for using new comparable sales. The following question must be answered: Why are these new comparable sales better than the sales in the appraisal report under review?
13. The new comparable sales provided by the review appraiser and reported in the sales comparison analysis grid must have closed on or before the effective date of the appraisal report under review. It may be appropriate to include data that was not available to the original appraiser as of the effective date of the original appraisal; however, that information should be reported as “supplemental” to the data that would have been available to the original appraiser.
14. The review appraiser must provide a sale or transfer history of the new comparable sales for a minimum of one year prior to the date of sale of the comparable sale. The review appraiser must analyze the sale or transfer data and report the effect, if any, on the review appraiser’s conclusions.
15. A review of an appraisal on a unit in a condominium, cooperative, or PUD project requires the review appraiser to analyze the project information in the appraisal report under review and comment on its completeness and accuracy.
16. An appraisal review of a manufactured home requires the review appraiser to assume that the HUD data plate information is correct, unless information to the contrary is available. In such cases, the review appraiser must identify the source of the data.
17. The review appraiser’s opinion of market value must be “as of” the effective date of the appraisal report under review.

One-Unit Residential Appraisal Desk Review Report

File # 15926209 R0051426

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS

1. The review appraiser will not be responsible for matters of a legal nature that affect either the property that is the subject of the appraisal under review or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal review. The review appraiser assumes that the title is good and marketable and will not render any opinions about the title.
2. The review appraiser will not give testimony or appear in court because he or she performed a review of the appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.
3. Unless otherwise stated in this appraisal desk review report, the review appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, expressed or implied. The review appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the review appraiser is not an expert in the field of environmental hazards, this appraisal desk review report must not be considered as an environmental assessment of the property.

REVIEW APPRAISER'S CERTIFICATION

The Review Appraiser certifies and agrees that:

1. I have, at a minimum, developed and reported this appraisal desk review in accordance with the scope of work requirements stated in this appraisal desk review report.
2. I performed this appraisal desk review in accordance with the requirements of the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal desk review report was prepared.
3. I have the knowledge and experience to perform appraisals and review appraisals for this type of property in this market area.
4. I am aware of, and have access to, the necessary and appropriate public and private data sources, such as multiple listing services, tax assessment records, public land records and other such data sources for the area in which the property is located.
5. I obtained the information, estimates, and opinions furnished by other parties and expressed in this appraisal desk review report from reliable sources that I believe to be true and correct.
6. I have not knowingly withheld any significant information from this appraisal desk review report and, to the best of my knowledge, all statements and information in this appraisal desk review report are true and correct.
7. I stated in this appraisal desk review report my own personal, unbiased, and professional analysis, opinions, and conclusions, which are subject only to the assumptions and limiting conditions in this appraisal desk review report.
8. I have no present or prospective interest in the property that is the subject of this report, and I have no present or prospective personal interest or bias with respect to the participants in the transaction. I did not base, either partially or completely, my analysis and/or opinion of market value (if any) in this appraisal desk review report on the race, color, religion, sex, age, marital status, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property or of the present owners or occupants of the properties in the vicinity of the subject property or on any other basis prohibited by law.
9. My employment and/or compensation for performing this appraisal desk review or any future or anticipated appraisals, appraisal field reviews or appraisal desk reviews was not conditioned on any agreement or understanding, written or otherwise, that I would report (or present analysis supporting) a predetermined specific value, a predetermined minimum value, a range or direction in value, a value that favors the cause of any party, or the attainment of a specific result or occurrence of a specific subsequent event (such as approval of a pending mortgage loan application).
10. I personally prepared all conclusions and opinions about the real estate that were set forth in this appraisal desk review report. I further certify that no one provided significant professional assistance to me in the development of this appraisal desk review report. I have not authorized anyone to make a change to any item in this appraisal desk review report; therefore, any change made to this appraisal desk review report is unauthorized and I will take no responsibility for it.
11. I identified the lender/client in this appraisal desk review report who is the individual, organization, or agent for the organization that ordered and will receive this appraisal desk review report.
12. The lender/client may disclose or distribute this appraisal desk review report to: the mortgagee or its successors and assigns; mortgage insurers; government sponsored enterprises; other secondary market participants; professional appraisal organizations; any department, agency, or instrumentality of the United States; and any state, the District of Columbia, or other jurisdictions; without having to obtain the review appraiser's consent. Such consent must be obtained before this appraisal desk review report may be disclosed or distributed to any other party (including, but not limited to, the public through advertising, public relations, news, sales, or other media).
13. The mortgagee or its successors and assigns, mortgage insurers, government sponsored enterprises, and other secondary market participants may rely on this appraisal desk review report as part of any mortgage finance transaction that involves any one or more of these parties.
14. If this appraisal desk review report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal desk review report containing a copy or representation of my signature, the appraisal desk review report shall be as effective, enforceable and valid as if a paper version of this appraisal desk review report were delivered containing my original hand written signature.
15. Any intentional or negligent misrepresentation(s) contained in this appraisal desk review report may result in civil liability and/or criminal penalties including, but not limited to, fine or imprisonment or both under the provisions of Title 18, United States Code, Section 1001, et seq., or similar state laws.

Supplemental Addendum

File No. R0051426

Borrower	Charles Bogle						
Property Address	195 Canary Hill Rd						
City	Kingston	County	Ulster	State	NY	Zip Code	12401
Lender/Client	Wells Fargo Bank NA						

• **One-Unit Desk Review: Information of the Site Section Complete and Accurate**
Based on review of data the information within the site section is incomplete. The highest and best per USPAP requires analysis which was not found or discussed as such. The following would be an acceptable description: The four tests used in the analysis of highest and best use of a property are (1) legally permissible, (2) physically possible, (3) financially feasible and (4) maximum profitability. The subject's present zoning classification is consistent with the current use and surrounding land uses. The subject's site is typical in size, shape and topography for residential dwellings. Therefore, the Highest and Best Use both vacant and improved, is Residential single family with residual acreage. Appraiser does not mention that subject site also fronts an additional roadway called Hurley Mountain Rd. This roadway is a traveled double yellow lined roadway and may pose an effect on marketabilty. Canary Hill Rd is situated higher in elevation to Hurley Mountain Rd and a portion of subject site has a drop off and not usuable. Appraiser within addendum mentions major roadways such as "Hurley Mountain Rd". So this roadway much pose a negative effect on marketabiltity, but not mentioned either way if said roadway has a positive of negative effect.

• **One-Unit Desk Review: Data and Analysis in the Sales Comparison Complete and Accurate**
Subject has two porches, but only 1 is listed on the sales grid. p2 of the 1004 report states no listings or sales in the subject neighborhood which is false as appraiser has utilized 5 sales in the sales grid. Additionally, market condition addendum stated area has 17 listings going back 3 months in area and is quite possible that there is a comparable that is listed similar to subject considering subject is on the market currently as of the date of the appraisal valuation. The 1004MC form is also left blank. The adjustments for gla are adjusted at $45/sf per appraiser. This figure does not appear substantiated as the sales have a range of sale price/gla from $532 - $937. This is an average of $776 for the sale price/gla from the 5 sales. The $45/sf adjustment is only 5.8% of that figure. Typically a 30% figure is seen in this price tier of a home or $232/sf.

This can be further tested by extraction of the remaining line items such as site. In using a site value of $150,000 from appraisers cost approach this value can be used to deduct from sales price of comparables. Sale 5 has a similar lot size as subject. If using this value minus the sale price this site value comprises approximately $67 of that $776. Therefore, the remainder of the $776 is $664 after removal of the gla and site figures. So the remainder of the $664 seems excessive for the remainder of the line items that compose the sales grid. The 2 major factors in a sales price is the actual home/gla and site value. So the $45/sf is too low based on market data.

Adjustments for acreage differences are also very minimal given subject site has a value per appraiser of $150,000 for 5.4 acres or $27,780/acre rounded. A figure of $3000/acre was used and not supported. Sale 5 has a similar acreage to subject, but is .40 acre less. An acreage amount such as this is minimal and likely would not have any market reaction.

Appraiser adjustment for basement differences seem inconsistent. Appraiser is stating subject 1024sf of total basement sf is equal to a 633sf,600sf basement of Sale 5 & 6 on line 1. Since it is mentioned in addendum of report that regardless of size a buyer will pay $10,000 across the board for any size basment compared to property with no basement. This is similar rationale in that $10,000 is applied for each finished basement room and bath regardless of the size of basement or rooms.

Sale 1 per public records included an additional parcel of land and appears appraiser has not verified the sale. MLS listing also states acreage has 19.30 acres, but appraise has used 17.40 acres. The sale consisted of a 17.40 acre parcel and a 1.90 ac parcel.

• **One-Unit Desk Review: Summary of Value Conclusion**
Due to lack of recent turnover of sales in the immediate area of the subject, it was necessary to use sales which closed over 6 months from the subject inspection date and over one mile away. It is not uncommon to travel over 4-5 miles to find similar sales to bracket specific line items. The difference in square footage was adjusted at $200/SF with no adjustment for less than 200sf. Sales contained a sale price/gla range of $502 - $875/sf. After deduction of line item differences including site value a figure of $200/sf was deemed appropriate. Site was adjusted at $25,000/acre thru paired sales with no adjustment for differences of 0.50 acre or less. A search was conducted in search of comparables within 90 days of date of valuation of subject. However, no other sales could be found and was necesssary to utilize sales that were available. Sale 2 was adjusted for quality of construction as home was a modern one level design home with open concept having a higher level of construction quality. Adjustments for differences were based on paired analysis. In instances where line items were not bracketed were based on historical sales analysis. Comparable sales that did not require adjustments for age although differing in age was due to their similarity in effective ages compared to the subject. Adjustments for condition were applied accordingly for Sale 4 as having dated interior to subject. Sale 1 was an older age home originally, but was renovated in 2000 and an adjustment for age was necessary. The adjustment was based on mls observation and the market reaction thru paird sales analysis. Adjustment for basement thru paired sales on line 1 for unfinished sf was done at $8/sf. Line 1 was also adjusted for finished sf at $20/sf. Line 2 was utilized for bath only at $8000/bath. Sale 2 was utilized to provide support for location near a busy roadway. Remaining comparable were adjusted accordinly for location based on paired sales. The value of the subject differs from the predominant value there is a market for the subject. Subject is not considered an over improvement for area. There are other properties in area similar to subject, but have not sold. There is no negative effect on marketability. Above average adjustments were necessary due to a blend of sales necessary to be used to provide support for line items o fsubject. As a result line, net, and gross adjustment was exceeded in areas. All sales were considered in the overall value of subject with final value determined thru weighted value calculator.

• **Comparable Summary**
Comparables Summary & Estimated Indicated Value

	Sale Price	Net Adj %	Grs Adj %	Ind Value	Weight
Comp #1:	1,575,000	19.3	33.1	1,271,100	22.11
Comp #2:	899,000	21.8	27.4	1,095,100	24.04
Comp #3:	1,435,000	8.5	24.3	1,313,400	25.09
Comp #4:	1,325,000	9	13.5	1,206,000	28.76

ESTIMATED INDICATED VALUE OF THE SUBJECT: 1,221,000

• **Indicated Weight Value**
Estimated indicated value is determined by using the Gross Adjustment of sale price for each comparable as a measure of the relative quality of the comp. The Indicated Value is derived by multiplying the weight of each comp by the Adjusted Sale Price of that comp, repeating for each property, then adding them all together. This weighted average is used as the indicated value of the subject.

Supplemental Addendum

File No. R0051426

Borrower	Charles Bogle						
Property Address	195 Canary Hill Rd						
City	Kingston	County	Ulster	State	NY	Zip Code	12401
Lender/Client	Wells Fargo Bank NA						

As with any method, this technique is not perfect.However, it does do a very good job of giving more weight to the most similar comps while at the same time minimizing values near the extremes of the indicated value range.

APPRAISAL AND REPORT IDENTIFICATION

This Report is one of the following types:

☒ Appraisal Report (A written report prepared under Standards Rule 2-2(a) , pursuant to the Scope of Work, as disclosed elsewhere in this report.)

☐ Restricted Appraisal Report (A written report prepared under Standards Rule 2-2(b) , pursuant to the Scope of Work, as disclosed elsewhere in this report, restricted to the stated intended use only by the specified client and any other named intended user(s).)

Comments on Standards Rule 2-3

I certify that, to the best of my knowledge and belief:
- The statements of fact contained in this report are true and correct.
- The reported analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions and are my personal, impartial, and unbiased professional analyses, opinions, and conclusions.
- Unless otherwise indicated, I have no present or prospective interest in the property that is the subject of this report and no personal interest with respect to the parties involved.
- Unless otherwise indicated, I have performed no services, as an appraiser or in any other capacity, regarding the property that is the subject of this report within the three-year period immediately preceding acceptance of this assignment.
- I have no bias with respect to the property that is the subject of this report or the parties involved with this assignment.
- My engagement in this assignment was not contingent upon developing or reporting predetermined results.
- My compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this appraisal.
- My analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the Uniform Standards of Professional Appraisal Practice that were in effect at the time this report was prepared.
- Unless otherwise indicated, I have made a personal inspection of the property that is the subject of this report.
- Unless otherwise indicated, no one provided significant real property appraisal assistance to the person(s) signing this certification (if there are exceptions, the name of each individual providing significant real property appraisal assistance is stated elsewhere in this report).

Reasonable Exposure Time

(USPAP defines Exposure Time as the estimated length of time that the property interest being appraised would have been offered on the market prior to the hypothetical consummation of a sale at market value on the effective date of the appraisal.)

My Opinion of Reasonable Exposure Time for the subject property at the market value stated in this report is: within 3 months

UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

Condition Ratings and Definitions

C1

The improvements have been recently constructed and have not been previously occupied. The entire structure and all components are new and the dwelling features no physical depreciation.

Note: Newly constructed improvements that feature recycled or previously used materials and/or components can be considered new dwellings provided that the dwelling is placed on a 100 percent new foundation and the recycled materials and the recycled components have been rehabilitated/remanufactured into like-new condition. Improvements that have not been previously occupied are not considered “new” if they have any significant physical depreciation (that is, newly constructed dwellings that have been vacant for an extended period of time without adequate maintenance or upkeep).

C2

The improvements feature no deferred maintenance, little or no physical depreciation, and require no repairs. Virtually all building components are new or have been recently repaired, refinished, or rehabilitated. All outdated components and finishes have been updated and/or replaced with components that meet current standards. Dwellings in this category are either almost new or have been recently completely renovated and are similar in condition to new construction.

Note: The improvements represent a relatively new property that is well maintained with no deferred maintenance and little or no physical depreciation, or an older property that has been recently completely renovated.

C3

The improvements are well maintained and feature limited physical depreciation due to normal wear and tear. Some components, but not every major building component, may be updated or recently rehabilitated. The structure has been well maintained.

Note: The improvement is in its first-cycle of replacing short-lived building components (appliances, floor coverings, HVAC, etc.) and is being well maintained. Its estimated effective age is less than its actual age. It also may reflect a property in which the majority of short-lived building components have been replaced but not to the level of a complete renovation.

C4

The improvements feature some minor deferred maintenance and physical deterioration due to normal wear and tear. The dwelling has been adequately maintained and requires only minimal repairs to building components/mechanical systems and cosmetic repairs. All major building components have been adequately maintained and are functionally adequate.

Note: The estimated effective age may be close to or equal to its actual age. It reflects a property in which some of the short-lived building components have been replaced, and some short-lived building components are at or near the end of their physical life expectancy; however, they still function adequately. Most minor repairs have been addressed on an ongoing basis resulting in an adequately maintained property.

C5

The improvements feature obvious deferred maintenance and are in need of some significant repairs. Some building components need repairs, rehabilitation, or updating. The functional utility and overall livability is somewhat diminished due to condition, but the dwelling remains useable and functional as a residence.

Note: Some significant repairs are needed to the improvements due to the lack of adequate maintenance. It reflects a property in which many of its short-lived building components are at the end of or have exceeded their physical life expectancy but remain functional.

C6

The improvements have substantial damage or deferred maintenance with deficiencies or defects that are severe enough to affect the safety, soundness, or structural integrity of the improvements. The improvements are in need of substantial repairs and rehabilitation, including many or most major components.

Note: Substantial repairs are needed to the improvements due to the lack of adequate maintenance or property damage. It reflects a property with conditions severe enough to affect the safety, soundness, or structural integrity of the improvements.

Quality Ratings and Definitions

Q1

Dwellings with this quality rating are usually unique structures that are individually designed by an architect for a specified user. Such residences typically are constructed from detailed architectural plans and specifications and feature an exceptionally high level of workmanship and exceptionally high-grade materials throughout the interior and exterior of the structure. The design features exceptionally high-quality exterior refinements and ornamentation, and exceptionally high-quality interior refinements. The workmanship, materials, and finishes throughout the dwelling are of exceptionally high quality.

Q2

Dwellings with this quality rating are often custom designed for construction on an individual property owner’s site. However, dwellings in this quality grade are also found in high-quality tract developments featuring residence constructed from individual plans or from highly modified or upgraded plans. The design features detailed, high quality exterior ornamentation, high-quality interior refinements, and detail. The workmanship, materials, and finishes throughout the dwelling are generally of high or very high quality.

UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

Quality Ratings and Definitions (continued)

Q3

Dwellings with this quality rating are residences of higher quality built from individual or readily available designer plans in above-standard residential tract developments or on an individual property owner's site. The design includes significant exterior ornamentation and interiors that are well finished. The workmanship exceeds acceptable standards and many materials and finishes throughout the dwelling have been upgraded from "stock" standards.

Q4

Dwellings with this quality rating meet or exceed the requirements of applicable building codes. Standard or modified standard building plans are utilized and the design includes adequate fenestration and some exterior ornamentation and interior refinements. Materials, workmanship, finish, and equipment are of stock or builder grade and may feature some upgrades.

Q5

Dwellings with this quality rating feature economy of construction and basic functionality as main considerations. Such dwellings feature a plain design using readily available or basic floor plans featuring minimal fenestration and basic finishes with minimal exterior ornamentation and limited interior detail. These dwellings meet minimum building codes and are constructed with inexpensive, stock materials with limited refinements and upgrades.

Q6

Dwellings with this quality rating are of basic quality and lower cost; some may not be suitable for year-round occupancy. Such dwellings are often built with simple plans or without plans, often utilizing the lowest quality building materials. Such dwellings are often built or expanded by persons who are professionally unskilled or possess only minimal construction skills. Electrical, plumbing, and other mechanical systems and equipment may be minimal or non-existent. Older dwellings may feature one or more substandard or non-conforming additions to the original structure

Definitions of Not Updated, Updated, and Remodeled

Not Updated

Little or no updating or modernization. This description includes, but is not limited to, new homes.

Residential properties of fifteen years of age or less often reflect an original condition with no updating, if no major components have been replaced or updated. Those over fifteen years of age are also considered not updated if the appliances, fixtures, and finishes are predominantly dated. An area that is 'Not Updated' may still be well maintained and fully functional, and this rating does not necessarily imply deferred maintenance or physical/functional deterioration.

Updated

The area of the home has been modified to meet current market expectations. These modifications are limited in terms of both scope and cost.

An updated area of the home should have an improved look and feel, or functional utility. Changes that constitute updates include refurbishment and/or replacing components to meet existing market expectations. Updates do not include significant alterations to the existing structure.

Remodeled

Significant finish and/or structural changes have been made that increase utility and appeal through complete replacement and/or expansion.

A remodeled area reflects fundamental changes that include multiple alterations. These alterations may include some or all of the following: replacement of a major component (cabinet(s), bathtub, or bathroom tile), relocation of plumbing/gas fixtures/appliances, significant structural alterations (relocating walls, and/or the addition of) square footage). This would include a complete gutting and rebuild.

Explanation of Bathroom Count

Three-quarter baths are counted as a full bath in all cases. Quarter baths (baths that feature only a toilet) are not included in the bathroom count. The number of full and half baths is reported by separating the two values using a period, where the full bath count is represented to the left of the period and the half bath count is represented to the right of the period.

Example:
3.2 indicates three full baths and two half baths.
