SCOPE OF WORK

This is an appraisal DESK review which does not include inspections of either the subject property or comparable sales, nor any field analysis. The scope of work for this appraisal DESK review is defined by the complexity of the appraisal report under review and the reporting requirements of this report form, including the following statement of assumptions and limiting conditions, and certifications. The review appraiser must, at a minimum: (1) read the entire appraisal report under review, (2) assume the property condition reported in the appraisal report is accurate unless there is evidence to the contrary, (3) perform data research and analysis to determine the appropriateness and accuracy of the data in the appraisal report, (4) research, verify, and analyze data from reliable public and/or private sources, (5) determine if the analysis and conclusions support the opinion of value, and (6) if the opinion of value is not supported and/or there appears to be significant deficiencies in the analysis and reporting, the assignment must be upgraded to an appraisal Field review.

INTENDED USE

The intended use of this appraisal desk review report is for the lender/client to evaluate the accuracy and adequacy of support of the appraisal report under review.

INTENDED USER

The intended user of this appraisal desk review report is the lender/client.

GUIDANCE FOR COMPLETING THE ONE-UNIT RESIDENTIAL APPRAISAL DESK REVIEW REPORT

The appraisal review function is important to maintaining the integrity of both the appraisal and loan underwriting processes. The following guidance is intended to aid the review appraiser with the development and reporting of an appraisal desk review:

1. The review appraiser must be the individual who personally read the entire appraisal report and performed the data research and analysis, and prepared and signed this report.
2. The review appraiser must focus his or her comments on the appraisal report under review and not include personal opinions about the appraiser(s) who prepared the appraisal.
3. The lender/client has withheld the identity of the appraiser(s) who prepared the appraisal report under review, unless otherwise indicated in this report.
4. The review appraiser must assume that the condition of the property reported in the appraisal report is accurate, unless there is evidence to the contrary.
5. The review appraiser must determine whether the opinion or market value is supported by the analysis, conclusions and reconciliation presented in the appraisal report.
6. The review appraiser must form an opinion about the overall accuracy and quality of the data in the appraisal report under review. The objective is to determine whether material errors exist and what effect they have on the opinions and conclusions in the appraisal report under review. When the review appraiser agrees that the data is essentially correct (although minor errors may exist), he or she must summarize the overall findings. When the review appraiser determines that material errors exist in the data, he or she must identify them, comment on their overall effect on the opinions and conclusions in the appraisal report under review, and include the correct information.
7. The Questions on Page 1 are intended to identify both the positive and negative elements of the appraisal under review and to report deficiencies. The review appraiser must make it clear to the reader what effect the deficiencies have on the opinions and conclusions in the appraisal report. Simple ?Yes? and ?No? answers are unacceptable.
8. The review appraiser must identify any extraordinary assumptions that were necessary in order to answer questions on Page 1. Extraordinary assumptions include the use of information from the appraisal report under review that the review appraiser concludes is reliable (such as an assumption that the reported condition of the subject property is accurate).
9. A review of an appraisal on a unit in a condominium, cooperative, or PUD project requires the review appraiser to analyze the project information in the appraisal report under review and comment on its completeness and accuracy.
10. An appraisal review of a manufactured home requires the review appraiser to assume that the HUD data plate information is correct, unless information to the contrary is available. In such cases, the review appraiser must identify the source of the data.

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS

1. The review appraiser will not be responsible for matters of a legal nature that affect either the property that is the subject of the appraisal under review or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal review. The review appraiser assumes that the title is good and marketable and will not render any opinions about the title.
2. The review appraiser will not give testimony or appear in court because he or she performed a review of the appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.

Unless otherwise stated in this appraisal desk review report, the review appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, expressed or implied. The review appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the review appraiser is not an expert in the field of environmental hazards, this appraisal desk review report must not be considered as an environmental assessment of the property.
