This form is designed to report an appraisal of a one-unit residential property. This form is not to be used when appraising the following types of properties: 2-4 residential units, commercial properties, manufactured/mobile homes, co-operative units, vacant land, properties with more than 5 acres, and properties with other than a Fee Simple or Leasehold interest. This report form can only be completed when Multiple Listing Service (MLS) data is used as the primary data source for the sales comparables.

This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications are not permitted without express authorization by the client. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Additional certifications that do not constitute material alterations to this appraisal report are permitted.

PURPOSE:

The purpose of this appraisal is to estimate the market value of the real property that is the subject of this report based on a sales comparison analysis solely for the use by the lender/client identified in the report.

INTENDED USE:

The intended use of this appraisal report is for internal asset evaluation by the lender/client. This report is not intended for any other use.

INTENDED USER:

The intended user of this appraisal report is limited solely to the identified lender/client. This is a Restricted Use Appraisal Report and the appraiser's opinions and conclusions set forth in the report may not be understood properly without additional information in the appraiser's workfile.

DEFINITION OF MARKET VALUE:

Market value means the most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

(1) Buyer and seller are typically motivated;

(2) Both parties are well informed or well advised, and acting in what they consider their own best interests;

(3) A reasonable time is allowed for exposure in the open market;

(4) Payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and

(5) The price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.

Single Unit Residential Form — Restricted Use Appraisal Report

SCOPE OF WORK:

The scope of work for the appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the cited definition of market value, statement of assumptions and limiting conditions, and certifications. The appraiser must, at a minimum: (1) identify the characteristics of the subject property that are relevant to the purpose and intended use of the appraisal, (2) research, verify, and analyze data from reliable public and/or private sources (3) use Multiple Listing Service (MLS) to identify comparable sales used to value the subject property, (4) include a minimum of 3 closed comparable sales and at least 1 comparable active listing or pending sale, (5) report his or her analysis, opinions, and conclusions in this appraisal report.

Unless otherwise noted, the appraiser has not physically inspected the subject property. In developing this appraisal, the appraiser has incorporated only the Sales Comparison Approach. The appraiser has excluded the Cost and Income Approaches to value, due to being inapplicable given the limited scope of the appraisal. The appraiser has determined that his or her appraisal process is not so limited that the results of the assignment are no longer credible, and the client agrees that the limited scope of analysis is appropriate given the intended use. The appraiser was able to obtain sufficient information about the subject's physical characteristics (such as room count, gross living area (GLA), site size, etc.) from his or her own research using public and private data sources deemed reliable to develop a credible opinion of value. These sources include, but are not limited to, tax and assessment records, Multiple Listing Service(s) (MLS), aerial mapping programs, prior appraisal files, etc.

EXTRAORDINARY ASSUMPTIONS:

At the client's request, and unless otherwise noted in the report, the following Extraordinary Assumptions have been made:(1) The subject is considered to be in average overall condition, and (2) There are no adverse environmental conditions (hazardous wastes, toxic substances, etc.) in, on or in the immediate vicinity of the subject property, and (3) The subject's projected use is not intended to change, and (4) There are no significant discrepancies between the subject's public record information or other data source(s) and the existing site or improvements. The use of any Extraordinary Assumptions might have affected the assignment results.
