SECTION III - INSPECTION SUMMARY AND RECOMMENDATIONS

☐ **NO DAMAGE.** No apparent neighborhood or subject property factors that negatively impact marketability were observed.

☐ **MINOR DAMAGE.** Apparent neighborhood and/or subject property factors that negatively impact marketability were observed, but are considered only minor and easily curable (Above-noted damage should be addressed by an appraisal update "as-is" or "subject to repairs", to be ordered separately per Client's direction from a qualified real estate appraiser, per loan underwriting requirements as necessary).

☒ **MODERATE TO MAJOR DAMAGE.** Apparent neighborhood and/or subject property factors that negatively impact marketability were observed and are considered moderate to major, but curable and likely to be repaired (Above-noted damage should be addressed by an appraisal update or new appraisal "subject to repairs", to be ordered separately per Client's direction from a qualified real estate appraiser, per loan underwriting requirements as necessary).

☐ **SEVERE DAMAGE/UNINHABITABLE.** Apparent neighborhood and/or subject property factors that negatively impact marketability were observed and are considered severe to the point of being "uninhabitable" - making further valuation services unnecessary, as the property no longer appears suitable as collateral for mortgage lending at this time.
